Adopting Microsoft Office 365: End User Training Webcast Series

MAY 9

TechNet Webcast Series: Introducing Office 365 to Your End Users

Date: Monday, May 9, 2011

Time: 1:00 PM PST

Abstract: Is your organization planning to roll out Microsoft Office 365 to your organization? You're familiar with the back-end cloud benefits, but how does Office 365 affect your users? In this fast-paced 60-minute presentation, we discuss strategy to make sure that your business captures the productivity gains that are possible with Office 365. Topics include planning pre-rollout training, generating excitement among your users, easing the tension of deployment day, and providing ongoing resources. **Presenter:** David Grimsman, Lead Trainer, BrainStorm.

MAY 12

TechNet Webcast: End User Tips and Tricks for Office 365: Focus on SharePoint Online

Date: May 12, 2011

Time: 9:00 AM PST

Abstract: *Are you wondering what Microsoft SharePoint Online is and how it impacts your organization?* Are you curious about what role it can play in your employees' productivity experience? Join us for a fast-paced 60-minute session that is designed to highlight the most exciting features of SharePoint Online. An instructor showcases a tip or a feature every few minutes, which provides you with a broad and real-world understanding of what the platform can do for your users. Topics include collaborating with team sites, simplifying document access through Microsoft Office Web Apps, coauthoring content by using Microsoft Office and SharePoint Online, automating business processes, and improving

communication with Microsoft Lync Online integration. **Presenter:** David Grimsman, Lead Trainer, BrainStorm**.**
