Mobile Design

The screenshot displays the Nintex Forms 2013 interface within a SharePoint environment. The top navigation bar includes 'Forms 2013 | SharePoint' and a 'PM' indicator. The main toolbar is divided into sections: 'Form' (Publish, Save, Close, Preview, Import, Export), 'Clipboard' (Paste, Copy, Select All), 'Settings' (Settings, Create Column, Live Settings), 'Layouts' (Desktop, Smart Phone, Nintex Mobile Phone, Nintex Mobile Tablet, Other Devices), and 'Workflow' (Replace With Layout, Delete Layout, Workflow Settings). The 'Form Controls' panel on the left lists various elements like Border, Button, Calculated Value, Choice, Date/Time, Hyperlink, Image, Label, Multi Line Textbox, and Page Viewer. The central workspace shows a form titled 'Forms 2013' with fields for 'First Name', 'Surname', 'Cost Center' (set to 'Sales'), and 'Status' (set to 'Pending'). Below these is a 'Manager' field and a table for 'Expense Items' with columns for 'Date', 'Expense Type' (set to 'Project'), 'Description', and 'Amount'. A 'Notes' field is at the bottom. The interface is designed for easy drag-and-drop form creation.

Nintex Products

Nintex Workflow for Office 365 extends business process automation to more people, places, and devices through seamless cloud integration.

Taking full advantage of the new cloud app model, Nintex has enabled seamless integration with Office 365. Using Nintex Forms for Office 365 scale and build forms on a robust platform.

Nintex Workflow adds a drag-and-drop workflow designer, connectivity and advanced workflow features to Microsoft SharePoint.

Nintex Forms is a web based designer that enables forms to be created within SharePoint quickly and easily. SharePoint forms can then be consumed on most common mobile devices.

Nintex Workflow for Project Server empowers project and portfolio managers to design and implement end-to-end workflows without the need for complex and costly development cycles.

Nintex Live adds value to your Nintex Workflow and Nintex Forms solutions by giving you access to a catalog of useful no-code cloud services, making it simple for you to extend the reach of your processes.
